Common Rail is the fuel injection system that meets strict emission regulations. It includes a high-pressure pump, injector, rail, filter and ECU. The current range of parts for diesel engines includes VE distributor pumps and parts, injector nozzles and testing equipments. diesel fuel injection spare parts fit for **#common rail nozzle marine diesel engines GYNDD5-2 boat engine parts online#** are available in Distributor Head, Plunger Return Spring, Feed Pump, Plunger Barrel, Drive Shaft, Cam Disk, Delivery Valve, Magnet Valve, Roller Ring, And Yoke. Distributor pumps employ a single injection cylinder operated by an axial cam plate. The fuel from the cylinder is sent to the fuel lines by means of a rotary distribution valve. The distributor pumps are available in VE type.
